Flipped Classrooms - Handout
January 2013 - 1

**Flipped Classroom Model**

**Learner-Generated**
Creative, Personalized Projects & Presentations

**Educator-Suggested**
Hands-on Activities
Games, Simulations, Interactives
Experiments
The Arts

**Concept Exploration**

**Demonstration & Application**

**Experiential Engagement**

**Meaning-Making**

**Flipped learning** is education that combines face-to-face classroom methods with computer-mediated activities.

**Flip teaching** (or flipped classroom) is a form of blended learning which encompasses any use of technology to leverage the learning in a classroom, so a teacher can spend more time interacting with students instead of lecturing. Related: differentiated instruction & project-based learning

How do you flip corporate learning? http://knowledgestarblog.wordpress.com/2013/01/10/flipping-corporate-learning/

Flipped Classroom Models www.usergeneratededucation.wordpress.com blog (great brain-based research out there)

NOTE: Members of ASTD National & eLearning Guild have access to additional resources on Flip Teaching (must be signed-in)

Bloom’s Taxonomy

Flip teaching allows more hands-on time with the instructor guiding the students, allowing them to assist the students when they are assimilating information and creating new ideas (upper end of Bloom’s Taxonomy)
